### 2. Departure and Ascent

As quickly as the aircraft leaves the runway, the multiplier begins at 1.00 x and begins climbing up. The longer the flight lasts, the greater the multiplier goes. However, the danger of the flight ending quickly likewise increases with every passing second.

### 3. The Cash-Out Dilemma

The supreme mechanic of the game is the cash-out button. Gamers should by hand press this button to gather their existing jackpots (Stake × Current Multiplier) before the flight concludes. If the flight ends before a cash-out takes place, the stake is lost.

  - *Pros:* Massive prospective returns on a single successful flight.
  - *Cons:* Extremely high frequency of losses; requires a durable bankroll.
