Over the previous few years, the online gaming landscape has undergone a huge change. Conventional table video games like blackjack and roulette remain staples, however gamers are increasingly drawn to vibrant, game-show-style experiences. At the outright forefront of this revolution is **Crazy Time**, a video game established by Evolution Gaming that has actually recorded the attention of millions worldwide.

Combining the simpleness of a money wheel with innovative increased reality, enormous multipliers, and four distinct bonus offer rounds, Crazy Time is a sensory overload in the very best possible way. This guide explores the mechanics, perk games, techniques, and data that specify this contemporary gambling establishment masterpiece.

What is Crazy Time?

Introduced in 2020 by Evolution, Crazy Time is built on the massive success of earlier wheel-based games like *Dream Catcher* and *Monopoly Live*. Hosted by charming presenters in a lively, circus-themed studio, the game focuses on a giant, 54-segment mechanical wheel.

The primary goal for players is simple: predict which segment the wheel will stop on after the host provides it a spin. Nevertheless, the game goes far beyond fundamental thinking by integrating a Top Slot multiplier function and 4 immersive perk rounds that can lead to payments of up to 25,000 x the gamer's stake.

The Wheel Breakdown

To understand how the video game works, one should initially look at the circulation of sectors on the primary cash wheel. There are 54 sections in overall, divided among numbers and bonus video games.

Section Type Number of Segments on Wheel Payment/ Function **1** 21 Pays 1:1 **2** 13 Pays 2:1 **5** 7 Pays 5:1 **10** 4 Pays 10:1 **Coin Flip** 4 Triggers the Coin Flip bonus round **Money Hunt** 2 Activates the Cash Hunt bonus offer round **Pachinko** 2 Activates the Pachinko bonus offer round **Crazy Time** 1 Activates the supreme Crazy Time bonus offer round

The Top Slot: Doubling Down on Excitement

Before every spin of the primary wheel, a two-reel **Top Slot** spins simultaneously above the primary game. One reel randomly chooses a bet spot (a number or a perk video game), while the other reel chooses a random multiplier (varying from 2x up to 50x).

If the bet spot and the multiplier align horizontally on the Top Slot, that multiplier is applied to the matching segment for that spin. If the primary wheel lands on that segment, all wins for that number or reward game are increased accordingly. This function is the main engine behind the game's most jaw-dropping payments.

The Four Crazy Time Bonus Rounds

The real magic-- and the highest win potential-- of Crazy Time lies within its four bonus offer games. When the wheel stops on a bonus section, gamers who put a bet on that sector are transported into a secondary video game mode.

1. Coin Flip

- **Frequency:** 4 sectors on the wheel
- **How it works:** An easy coin with a red side and a blue side is turned by a machine. Before the flip, random multipliers are assigned to each side of the coin. Whichever side lands face up identifies the gamer's payment.
- **Rescue function:** If the multipliers designated to the coin are too low, a "Rescue Flip" can sometimes be set off, giving players a possibility at much better multipliers.

2. Cash Hunt

- **Frequency:** 2 sections on the wheel
- **How it works:** Players are presented with a massive screen showing a grid of 108 random multipliers hidden behind shooting gallery targets. A countdown starts, and gamers must intend and fire a virtual cannon at a target of their option before time goes out. As soon as the timer expires, all targets are revealed, and players get the multiplier hidden behind their selected target.

3. Pachinko

- **Frequency:** 2 sections on the wheel
- **How it works:** Inspired by the conventional Japanese arcade video game, Pachinko features a big wall filled with physical pegs. The host drops a puck from the top, and it bounces arbitrarily down the board until it lands in among a number of multiplier zones at the bottom.
- **Unique feature:** If the puck lands in a "DOUBLE" zone, all multipliers at the bottom of the wall double, and the host drops the puck once again, enabling intensifying multipliers.

4. Crazy Time

- **Frequency:** 1 segment on the wheel
- **How it works:** The supreme bonus offer round takes players behind a red door into a surreal, brilliantly colored virtual world featuring a huge virtual wheel. Players select among three flappers (Green, Blue, or Yellow). The host spins the wheel, and the player wins the multiplier where their selected flapper stops. Much like Pachinko, this wheel includes "DOUBLE" and "TRIPLE" segments, which can push the optimal prospective payout to an incredible 25,000 x.
