Gamers position bets on where they think the wheel will stop after a spin.

Nevertheless, what separates Crazy Time from basic cash wheel video games-- like *Dream Catcher*-- is the inclusion of the **Top Slot**. Above the primary wheel sits a two-reel mini slot device that spins concurrently with every primary wheel spin. This Top Slot produces a random multiplier for a specific bet sector, which can significantly enhance payouts if that sector strikes on the primary wheel.

## The Four Wild and Wacky Bonus Rounds

The true heart of the Crazy Time experience depends on its four interactive bonus offer rounds. Whenever the wheel stops on one of these sections, gamers who placed a bet on that specific perk round are transferred to a secondary video game space, either physically in the studio or via immersive digital graphics.

Bonus offer Round Frequency on Wheel Maximum Potential Multiplier Description **Coin Flip** 4 segments 5,000 x A simple red and blue coin is flipped to identify a multiplier. **Money Hunt** 2 sectors 10,000 x A shooting gallery screen with 108 random multipliers concealed behind signs. **Pachinko** 2 sections 10,000 x A glowing puck is fallen a peg wall to land in a multiplier slot. **Crazy Time** 1 section 20,000 x An enormous virtual wheel behind a red door offering life-altering multipliers.

This is the most frequent bonus offer round. The host steps up to a digital flipping device. A coin with a Red side and a Blue side is turned, and whichever side lands deal with up awards the corresponding multiplier to the gamer. Before the flip, multipliers are randomly designated to both sides, and a "Rescue Flip" can often occur if the initial multipliers are deemed too low.

### 2. Cash Hunt

Gamers exist with a huge screen displaying 108 random multipliers camouflaged behind different shooting gallery icons (like a cactus, a target, or a sheriff's badge). Utilizing a virtual cannon, the player must aim and fire at one sign before the timer runs out. When the timer expires, all signs reveal their concealed multipliers, and the player wins the multiplier behind their selected target.

### 3. Pachinko

Inspired by the standard Japanese arcade game, this round features an enormous physical wall filled with pegs. The host drops a radiant puck from the top, and it bounces arbitrarily down the board till it lands in among the slots at the bottom, each including a multiplier. If the puck lands in a "Double" slot, all multipliers on the board double, and the puck is dropped again as much as a maximum multiplier limit.

### 4. Crazy Time

Before the wheel is spun, the player must pick one of three flappers (Green, Blue, or Yellow). The wheel spins, and whatever multiplier the selected flapper indicate is awarded. If it indicates "Double" or "Triple," all multipliers on the wheel increase, and the wheel spins again up to an optimum cap of 20,000 x.
