The Myth and Reality of the "Crazy Time Slot"

When players look for or go over a "Crazy Time slot," they normally imply one of two things:

1. **Time-based patterns:** The belief that reward rounds or big multipliers drop more often at specific times of the day (e.g., peak hours vs. off-peak hours).
2. **The "Hot and Cold" fallacy:** Tracking history to find out when a bonus round is "due" to hit.

Are There Winning Time Slots?

Statistically speaking, **no**. Every spin of the *Crazy Time* wheel is an independent event. The physical mechanics of the wheel, integrated with licensed RNG software application for the Top Slot multipliers, ensure that past spins have no bearing upon future outcomes.

A benefit round that has not appeared for 40 spins disappears likely to strike on the 41st spin than it was on the very first.
