The Mathematics of Wagering: Payouts and House Edge

When played peer-to-peer, Rock Paper Scissors is a zero-sum game with reasonable odds. However, when played in a casino setting or on specialized crypto-gambling platforms, your house needs to maintain an edge.

Generally, online Rock Paper Scissors games include a best-of-one format or a best-of-three series. Since ties take place often (roughly 33% of the time), platforms handle draws in different ways.

Game Format	How Ties Are Handled	Approximate House Edge
Best of One	Money reimbursed on a tie; re-throw	1%-- 3% (through platform rake)
Best of Three	Re-throw just the connected round	2%-- 4%
Fixed Odds (vs. House)	House wins all ties	Up to 15% (Unfavorable)

Note: Players must always examine the rules regarding ties before positioning a bet. A platform where your house wins on ties drastically increases your house edge.

Psychological Strategies: How to Outsmart Your Opponent

Since human beings depend on cognitive faster ways, they are notoriously predictable. Mastering the Rock Paper Scissors game of chance needs an understanding of behavioral psychology.

Statistically, novices and novices throw **Rock** more frequently than any other sign. Why? Since Rock feels effective, aggressive, and visually heavy.

- **The Counter:** If you think an amateur challenger is going to throw Rock based upon instinct, always open with **Paper**.

2. Exploiting the Loser's Shift

When human beings lose a round, they hardly ever throw the same sign once again. Rather, they generally shift to what *would* have beaten the sign that simply defeated them.

- *Example:* If Player A utilized **Rock** to beat Player B's **Scissors**, Player B lost with Scissors. In the next round, Player B will likely change to **Rock** (thinking it beats the previous winning move) or **Paper**.
- **The Counter:** Anticipate this shift and choose the indication that defeats their most likely next relocation.

3. Making use of the Winner's Stays

On the other hand, when gamers win a round, they tend to stick with the winning sign for the next throw.

- **The Counter:** If your challenger just won with **Paper**, expect them to toss **Paper** once again. Counter it with **Scissors**.
