The objective is easy: choose a tile on the existing level, hope it exposes a safe course (such as a crown, a star, or a clear step), and advance to the next level.

Each successful step increases the player's possible payment. However, with every tier climbed, the risk boosts. Concealed below one or more of the tiles on each row is a trap (like a bomb or a skull). If a player chooses a trap, the round ends immediately, and their wager is lost.
