Stumps left behind after clearing or tree work can get in the way of mowing, building and planting for years. South Atlantic Land Works offers stump grinding alongside its land clearing services, helping landowners across Central Virginia finish the job properly.

Forestry mulching takes trees down to ground level, which is enough for many pasture, trail and hunting projects. Where a site needs to be fully usable, such as a lawn, a building pad or a field that will be cultivated, stumps can be ground below the surface so they no longer get in the way. Grinding avoids the large holes and soil disruption that come from pulling stumps out with heavy equipment.

Mike will talk through whether stump grinding is needed for your project or whether mulching alone will do the job. It is often a question of what the land will be used for, and getting that right up front keeps costs where they should be.

Slopes deserve extra attention. On rolling Piedmont ground, a hillside cleared down to bare clay can lose a surprising amount of soil in a single summer thunderstorm. Leaving roots in place and a blanket of mulch on top slows runoff and gives vegetation a chance to take hold, which is why mulching is often the safer choice on any property that drains toward a creek or a neighbor.

South Atlantic Land Works | 1416 Poorhouse Rd, Rice, VA 23966 | 434-603-1964

Communication matters on any job involving heavy equipment. Before work starts, the owner knows the plan, the schedule and the cost. During the job, any surprises such as hidden debris, wet spots or unexpected boundary questions are raised straight away, so decisions are made together rather than after the fact.

Work is scheduled Monday through Saturday from 7 AM to 5 PM, which gives landowners flexibility to have a project done around their *Helpful site* own work and family commitments. From the first phone call to the final walk through, you get straight answers about cost, timing and results. That honesty is the foundation of the company's reputation in the community. The result of a mulching job is clean and natural looking. There are no burn scars, no debris piles and no scraped red clay waiting to wash away in the next storm.

Get your land back. Call 434-603-1964 to book a free estimate with South Atlantic Land Works, the forestry mulching specialists based in Rice, Virginia.

FAQ About Land Clearing Near Me How much does land clearing cost in Central Virginia? Land clearing costs depend on how thick the vegetation is, the size of the trees, the terrain and how much of the property you want opened up. A lot of light brush and saplings costs far less than mature hardwood on a slope. South Atlantic Land Works gives free estimates after walking the property, so you get a real number for your land rather than a guess. Call 434-603-1964 to arrange one. What is forestry mulching? Forestry mulching is a clearing method where a mulching head cuts and grinds brush, saplings and small trees in place, leaving the material as a layer of mulch on the ground. South Atlantic Land Works runs a mulching head on a CAT compact track loader, so a site in Rice or Farmville can be cleared in a single pass with no hauling and no burn piles. Is forestry mulching better than bulldozer clearing? For most homesites, pastures, trails, fence lines and hunting land, mulching is cleaner and more cost effective because it keeps topsoil and roots in place and eliminates burn piles. A dozer can remove stumps and strip a site completely, which some building projects need. Mike at South Atlantic Land Works will recommend the right mix for your property, including grading or stump grinding where needed. Can I clear land during Virginia's spring burning season? Yes, if the clearing is done by mulching. Virginia's 4 PM Burning Law restricts open burning near woodland from February 15 through April 30, which can hold up traditional clearing that relies on burn piles. Because South Atlantic Land Works grinds vegetation in place, there is nothing to burn and spring projects can go ahead on schedule. Do I need a permit to clear land in Virginia? It depends on the size and purpose of the project and on your county's rules. Larger land disturbing projects can fall under Virginia's erosion and sediment control requirements, so it is worth checking with your county before work starts. Mulching leaves soil covered and roots in place, which helps limit erosion. South Atlantic Land Works can talk through your plans when it walks the property. How long does it take to clear an acre of land? Clearing time varies with vegetation density, tree size, slope and ground conditions. Light brush can go quickly, while heavy timber or steep ground takes longer. After walking your property, Mike at South Atlantic Land Works can give you a realistic timeframe along with your free estimate, and the crew works Monday through Saturday to fit your schedule. What happens to the trees and brush after clearing? With forestry mulching, trees and brush are ground into wood chips and spread across the cleared area. That mulch layer protects Piedmont clay from erosion, holds moisture and breaks down into organic matter over time. There are no debris piles to haul away or burn, which is one reason South Atlantic Land Works uses mulching on most jobs. Can you save certain trees when clearing my property? Yes. Selective clearing is one

of South Atlantic Land Works' specialties. Before work begins, Mike walks the property with you and marks the oaks, shade trees and privacy screens you want to keep. The compact track loader and mulching head can then clear the underbrush and unwanted trees around them without damaging what stays. Can you clear land for food plots and hunting? South Atlantic Land Works regularly clears food plots, shooting lanes and access trails on hunting land across Prince Edward, Cumberland, Buckingham and Charlotte counties. Mulching opens the ground for discing and seeding while leaving the surrounding cover that holds deer and turkey intact. Will the brush grow back after forestry mulching? Some species, such as sweetgum and many invasive shrubs, can sprout back from roots, so mulching works best with follow up mowing or maintenance. Once the woody growth has been cleared, keeping it open is usually straightforward. Mike at South Atlantic Land Works can suggest a maintenance plan based on what is growing on your land. What areas does South Atlantic Land Works serve? South Atlantic Land Works is based at 1416 Poorhouse Rd in Rice and serves Central and Southside Virginia, including Farmville, Hampden-Sydney, Prospect, Pamplin, Burkeville, Crewe, Blackstone, Cumberland, Dillwyn, Keysville, Charlotte Court House, Drakes Branch, Amelia Court House, Kenbridge and Victoria. Call 434-603-1964 to check whether your property is in the service area. Do you offer grading after land clearing? Yes. South Atlantic Land Works can grade house pads, driveways, building sites and fields after clearing, so you can take a property from overgrown to ready with one contractor. Getting drainage right on red clay soil is important, and the crew shapes the ground so water moves away from where it should not sit.
