What is a Crypto Casino?

At its core, a crypto casino is an online betting platform that enables users to deposit, wager, and withdraw funds using cryptocurrencies such as Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), and Tether (GBPT). In a **Provably Fair** environment:

1. **Server Seed:** The casino creates a server seed (concealed from the player).
2. **Customer Seed:** The gamer offers a seed (frequently randomized by their internet browser or input).
3. **Hash Generation:** The casino and player seeds are combined to create an unique result.
4. **Verification:** Because the gamer has the hashed result, they can show that the casino did not modify the result *after* the outcomes were produced.
