

WHAT ARE PEPTIDES?

Peptides are short-chain amino acids that bind together to act as building blocks to support the function of proteins.

Proteins are present in every living organism and are responsible for a variety of functions. They act as hormones, deliver messages from tissue to blood, regulate appetite, and more.

HERE IS HOW PEPTIDES CAN SUPPORT DIFFERENT FUNCTIONS IN OUR BODIES

Peptides for the Skin

Topical peptides have molecules small enough for skin absorption.

One example is **collagen**. Collagen helps make our skin smooth, firm, and glowing. As we age our bodies stop producing collagen naturally, but thanks to collagen peptides, we can prevent premature skin aging by signaling the body to produce more collagen.

Peptides for Muscle Repair

Some peptides, such as **GHRP or Growth Hormone Releasing Hexapeptide**, help speed up the repair of torn tissues and muscle fibers. Ideal for injuries and recovery, or those seeking to build more muscle mass.

Examples:

- ✓ TB-500
- ✓ BPC-157
- ✓ Selective Androgen Receptor Modulators

WHO COULD BENEFIT FROM PEPTIDES?

Those who want to combat aging skin

Fitness buffs

Those suffering joint disorders

Bodybuilders

And more

WHERE CAN I GET PEPTIDES?

Dr. Seeds offer the **Body Protective Complex**, a daily supplement that helps athletes repair their bodies after intensive workouts and exercise.
