A **case battle** is a head-to-head (or multi-player) gamble that utilizes the video game's official weapon cases as the random-number generator. Each participant transfers a set number of case-opening credits (frequently acquired with genuine money or by means of skins). When the battle starts, the platform instantly opens an identical series of cases for every gamer. The total worth of the skins gotten is tallied, and the individual with the highest combined rate wins the remaining swimming pool-- generally the amount of all deposits minus a small home cost.

The appeal lies in the **immediate thrill** of seeing a rare float-value skin appear on your screen, the **social competition** (players can view challengers open their cases in genuine time), and the **potential to walk away with a high-value item** worth even more than the cost of the cases.
