

A persistent musty odor in the basement is one of the most common complaints JLB Foundation Repair and Basement Waterproofing addresses for Gladstone area homeowners. This odor typically indicates mold or mildew growth somewhere in the basement, often in areas not immediately visible, such as behind finished walls or under flooring. JLB's team investigates the source of the odor as part of a comprehensive basement assessment, identifying the moisture issue responsible for the mold growth.

JLB Foundation Repair and Basement Waterproofing | 111 NE 72nd St Ste 111, Gladstone, MO 64119 | (816) 408-3651

Addressing the underlying moisture problem, rather than simply masking the odor, [basement waterproofing](#) is essential for a lasting solution that prevents the mold and smell from returning. For a musty basement odor in Gladstone MO, contact JLB Foundation Repair and Basement Waterproofing at (816) 408-3651.
