2. **Non-Custodial (Web3) Casinos:** Decentralized applications (dApps) where players connect their Solana wallets (like Phantom or Solflare) and play straight from their self-custody wallets without creating an account.

Why Solana is Changing the Game for iGaming

The online betting industry requires two primary features from its payment facilities: speed and security. Solana provides on both fronts, offering distinct advantages over legacy systems and even older blockchains.

Solana, by contrast, boasts a block time of roughly 400 milliseconds. This means deposits and withdrawals take place in real-time, eliminating the aggravating "pending" durations familiar to online bettors.

2. Negligible Transaction Fees

When playing online, every cent matters. On Ethereum or Bitcoin networks, network costs (gas) can surge substantially throughout peak hours, in some cases costing more than the real bet a gamer wishes to place. Solana transactions usually cost a fraction of a cent **Bitz BTC Casino** (£ 0.00025), permitting players to move their funds easily without consuming into their bankrolls.
