A CS [CS2 Gambling](#) gambling site is an online platform that lets users stake **CS: GO skins** (or other virtual items) on a variety of games of chance and ability. Instead of utilizing fiat cash, many sites accept skins as the de-facto currency since Valve's API allows third-party sites to confirm ownership without exposing the player's Steam login.

Common video game formats consist of:

Game Type	Description	Normal House Edge
Skin Roulette	Players place a skin on a spinning wheel; the wheel arrive on a random section.	2-- 5%
Coin Flip/ Flip	2 users bet skins; a virtual coin decides the winner.	1-- 3%
Crash	A multiplier increases up until it "crashes"; gamers money out before the crash to lock in revenue.	1-- 4%
Match Betting	Users bet on the result of expert CS: GO matches or competitions.	Varies (frequently 4-- 7%)
Jackpot/ Lottery	All entries enter into a pool; one winner receives the full pot (minus a cost).	2-- 6%
Casino Games	Slots, blackjack, and poker adjusted to skin betting.	3-- 5%

The "house edge" is the built-in earnings margin that the site retains from each wager, similar to standard online casinos.
