Dead pixels and patchy colour are two of the faults people tolerate for months before asking anyone about them. A tiny black or bright dot that never moves, a green or pink tint creeping in from the edge, or a yellowish patch that was not there when the phone was new can all seem minor on a good day. They are worth understanding, because some stay exactly as they are for years while others slowly spread across the display.

A dead pixel is a single point that no longer lights up properly, usually showing as black, white or one fixed colour. A stuck pixel looks similar but can sometimes recover by itself. Discolouration covers broader changes such as tints, dark blotches or areas that look smudged. Pressure is a common culprit, so a phone that has been dropped, sat on or squeezed into a tight pocket can show coloured marks even when the glass looks perfect, and moisture can stain a display from the inside as well. Before assuming the phone screen repair worst, wipe the screen with a soft dry cloth and peel off any protector, since dust or residue underneath can imitate a fault very convincingly.

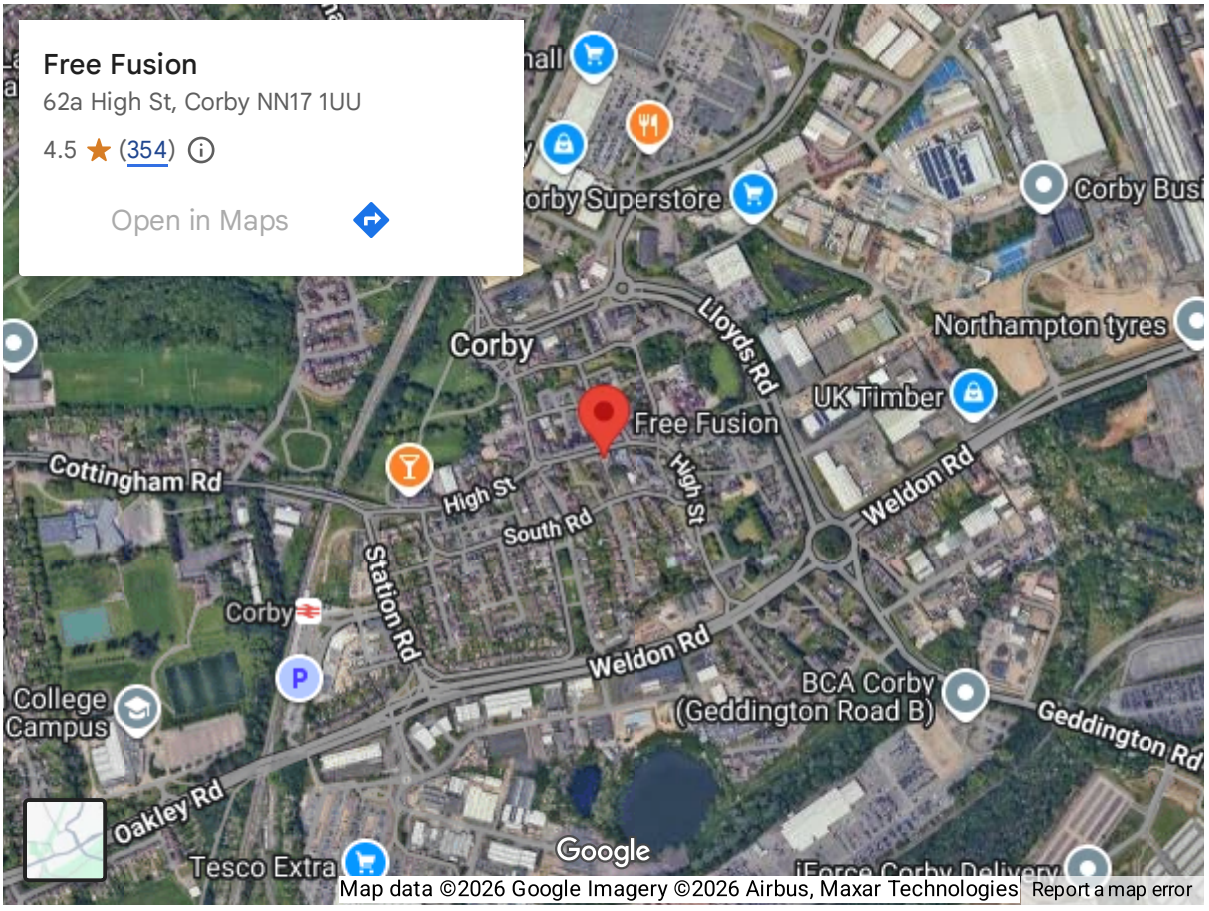

Free Fusion | 62a High St, Corby NN17 1UU | 01536 260 558

If the marks are still there after cleaning, a quick check will tell you whether the display itself is at fault. Free Fusion in Corby offers free diagnosis for local customers, so you can find out what is going on without committing to a repair. When the screen is the problem, the cure is a replacement display, because pixels cannot be polished or rubbed back to life. iPhone screen repairs start from £24.99, and iPad screens start from £39.99.

Whether to act depends on how much the fault bothers you and whether it is growing. A single static dot is something many people live with. Coloured lines spreading from an edge, a dark patch that gets bigger or a tint that worsens over a few weeks usually means the display is failing and will not improve on its own. Most smartphone screen replacements take about an hour at the Corby centre, which makes it easy to deal with the problem early, and we repair Samsung Galaxy, Google Pixel and other brands alongside Apple devices.

Not sure whether your marks are dust, a protector problem or a genuinely faulty display? Call Free Fusion on 01536 260 558, or bring the phone to 62a High St in the Old Village area of Corby and we will examine it while you are there. Customers across Northamptonshire can also post a device to us for a postal phone screen repair.

FAQ About

Phone Screen Repair How much does it cost to fix a phone screen? Prices vary by model and screen type. At Free Fusion in Corby, iPhone screen repairs start from £24.99 and iPad screen repairs from £39.99. Local customers get a free diagnosis, so you will know the exact price for your handset before any work begins. How much does an iPhone XS screen repair cost? The price for an iPhone XS depends on the exact model and the screen being fitted, so the quickest way to get an exact figure is to call Free Fusion on 01536 260 558. Our iPhone screen repairs start from £24.99, and we will confirm the price for your model before we start. Most iPhone screen replacements are done in about an hour. How much does an iPhone screen repair cost in the UK? Across the UK the price depends on the model, and newer iPhones generally cost more to repair than older ones. At Free Fusion in Corby, iPhone screen repairs start from £24.99. We also offer a postal service, so you can get the same pricing wherever you live in the UK. How long does a phone screen repair take? Most smartphone screen replacements at Free Fusion take about an hour, and most repairs are completed the same day. You are welcome to walk into our Corby centre and wait, or call 01536 260 558 first to check we have the part for your model. Is it worth repairing a cracked phone screen? For most phones it is, particularly when repair prices start from £24.99 and the rest of the phone works well. A cracked screen can let in moisture and dust and can get worse over time. If you are unsure, Free Fusion offers a free diagnosis for local customers so you can decide with the facts in front of you. Can you repair the screen on my Samsung, Pixel or iPad? Yes. Free Fusion repairs screens on Samsung Galaxy phones, Google Pixel, iPads and Apple Watches as well as iPhones, plus screens on MacBooks and laptops. Call 01536 260 558 with your model and we will talk you through the options. What should I do straight after cracking my phone screen? Back up your phone if you can still use it, and avoid pressing on broken glass or touching sharp edges. A screen protector film or clear tape over the glass can keep it from shedding while you get to a repair shop. Then bring it to Free Fusion at 62a High St, Corby, or call 01536 260 558 for advice. Can a screen with lines, flickering or a black display be repaired? Often yes, though the cause can be the screen itself or something else inside the phone. That is why a proper diagnosis matters. Free Fusion offers a free diagnosis for local customers in Corby, so you only pay for the repair that is actually needed. Is a screen repair covered by a warranty? Yes, repairs at Free Fusion are backed by a warranty. Ask the team about the terms that apply to your repair when you visit us in Corby or phone 01536 260 558. Do you offer postal phone screen repair? Yes, we repair devices sent in from anywhere in

the UK using Royal Mail and DPD. Posted devices are typically tested and dispatched on the day they arrive. Call 01536 260 558 before you send anything so we can advise on the best way to package it.
