1. Coin Flip

- **Frequency:** 4 sectors on the wheel.
- **How it works:** A simple coin with a red side and a blue side is turned by a machine. Each side is appointed a random multiplier before the flip. Whichever color lands face up wins the multiplier for the participating gamers. If multipliers are low, a "Rescue Flip" can sometimes be triggered for another chance.

2. Cash Hunt

- **Frequency:** 2 segments on the wheel.
- **How it works:** Players deal with a massive virtual screen featuring 108 random multipliers hidden behind shooting gallery symbols (like a cactus, a target, or a chef's hat). A countdown timer begins, and players should use their cursor (or let the video game auto-shoot) to aim and fire at a sign. When time runs out, the hidden multiplier behind the chosen sign is exposed and applied to the gamer's stake.

3. Pachinko

- **Frequency:** 2 sectors on the wheel.
- **How it works:** Inspired by the traditional Japanese arcade game, gamers are presented with a large physical wall filled with pegs. The host drops a puck from the top, and it bounces arbitrarily down through the pegs till it lands in one of several multiplier zones at the bottom. If the puck lands in a "DOUBLE" slot, all multipliers on the board double, and the puck is dropped again for huge possible wins.

4. Crazy Time

- **Frequency:** 1 segment on the wheel.
- **How it works:** The supreme reward round. The host opens a red door, walking gamers into a surreal, vibrantly colored virtual wonderland featuring an enormous giant wheel. Players should choose among 3 flappers (Green, Blue, or Yellow). The wheel is spun, and whatever multiplier the selected flapper indicate is awarded. Just like Pachinko, landing on "DOUBLE" or "TRIPLE" increases all the values on the wheel and sets off a re-spin, approximately an optimum cap of 20,000 x.
