Historically, players deposited their skins directly from their Steam stocks into a platform's bot account. In return, the site credited the user's account with on-site balance. Today, due to tighter limitations by Valve on automated trading bots, numerous platforms utilize alternative deposit methods, including:

- **Cryptocurrencies:** Bitcoin, Ethereum, GBPT, and Litecoin.
- **Fiat Currency:** Credit/debit cards, e-wallets (PayPal, Skrill), and regional payment entrances.
- **Peer-to-Peer (P2P) Trading:** Direct product transfers between users assisted in by the platform.
