What is the Towers Game?

At its core, Towers is an instant-win multiplier game. Influenced by traditional puzzle mechanics and the ageless "minesweeper" genre, the game drops players at the base of a multi-tiered tower. The goal is basic: select a tile on the existing level, hope it exposes a safe path (such as a crown, a star, or a clear step), and advance to the next level.

Each successful step increases the gamer's potential payment. However, with every tier climbed up, the risk increases. Concealed underneath one or more of the tiles on each row is a trap (like a bomb or a skull). If a player selects a trap, the round ends immediately, and their wager is lost.

The appeal depends on player agency. Unlike slots where the result is totally passive once the spin button is pushed, Towers enables gamers to determine when to cash out.
