For service-based businesses, a website needs to do more than sit online and look decent. It needs to help people call, send a lead, and trust what they are seeing on their phone. That is especially true for contractors and local companies that rely on steady calls and form submissions.

Scalable Websites is a website design company based in Montgomery, TX, built around that kind of practical need. Founded in January 2025 and veteran-owned, the company builds and manages mobile-first websites for contractors, home service businesses, and local small businesses. The team brings 10+ years of experience and 200+ websites built for home service businesses, which matters when the job is small business website design montgomery tx not just design, but making a site work for the way service companies actually get customers.

Built for contractors and local service businesses

A lot of small business website design falls short because it forgets how customers behave. Most people are on their phones. They want to tap to call, check reviews, and send a quick message without digging through a confusing menu.

That is why contractor website design needs to be simple and useful from the start. Every site from Scalable Websites includes click-to-call, Google reviews shown on the site, custom lead forms with instant text and email alerts, on-page SEO from day one, and hosting web design montgomery tx and security included as part of the website package.

The company works with trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and 30+ more. That focus matters. The needs of a home service business are different from a restaurant or an online store. A contractor website has to support fast contact, clear service information, and lead handling that does not get missed.

For companies looking for a website designer Montgomery TX businesses can meet with locally, Scalable Websites also meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

Custom WordPress websites that can grow with the business

Some businesses need a simple online presence. Others need a larger site with room for more service pages, blogging, and added support. That is where custom WordPress websites make sense. They give a business a structure that can grow over time instead of boxing it into a one-size-fits-all setup.

Scalable Websites offers custom web design, website redesign, custom WordPress websites, and website maintenance. The plans are straightforward:

- Starter, $95 a month for a single-page site
- Growth, $195 a month for 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics
- AI Enhanced, $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations
- Every plan has a 6-month minimum, then goes month-to-month

- The client owns the site after 36 months, with a free design refresh every 36 months and a 30-day money-back guarantee on signup

That setup gives service businesses options. A newer company may only need a single-page site to get started. A growing company may need more pages and better lead follow-up. A more established business may want a larger site and priority support. The point is not to overload a company with extras it does not need. The point is to match the website to the way the business operates right now, while leaving room to grow.

Website redesign and maintenance that keep things moving

A website redesign is often less about making things flashy and more about fixing what is not working. Maybe the site is outdated on mobile. Maybe it is hard to update. Maybe leads are coming in slowly because the site does not make it easy for people to act.

For businesses searching for web design Montgomery TX or web design The Woodlands, that practical side matters. A redesign should improve usability, make the business look current, and support real lead flow. It should also come with ongoing support after launch, because websites need attention over time.

That is where website maintenance becomes important. Scalable Websites includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a busy contractor or local business owner, that means less time worrying about the site and more time staying focused on the work.

Maintenance is not just a technical extra. It is part of keeping a website useful month after month. Phone numbers change. Service areas expand. New reviews come in. Photos need updating. A website should be able to keep up with the business, not become another task sitting on the back burner.

A local company with a practical approach

For many service businesses, it helps to work with a local provider who understands the area and can meet in person. Scalable Websites serves Montgomery County and greater Houston as a service-area business, and it is open Monday to Friday, 8 AM to 5 PM. Owner Preston Toor leads a veteran-owned company with a 5.0-star Google rating.

That local presence matters whether someone is looking for small business website design in Montgomery, a website redesign in The Woodlands, or contractor website design for a growing home service company elsewhere in the greater Houston area. The goal is simple, build a website that works well on mobile, supports leads, and is managed in a way that makes sense for the business owner.

A website should help a service business answer the same basic question every owner asks, can people find us, trust us, and contact us without hassle? When the answer is yes, the site is doing its job.
