Player B Wins	33.33%	Player B chooses the winning counter.
Tie (Draw)	33.33%	Both gamers select the same shape.

- **Mind Games and Bluffing:** In live or video-based gambling settings, verbal cues, body movement, and pacing can affect an opponent's option. For instance, subtly gesturing towards one hand can fool an opponent into countering a relocation you never ever planned to make.
- **Track Your Opponent:** In multi-round matches, keep mental or physical notes of your opponent's tendencies. Do they favor Paper? Do they constantly switch after a loss? Exploit these specific routines.
