The mechanics are straightforward:

4. **The Winner:** At the end of all rounds, the gamer (or team) who has accumulated the highest total monetary worth of skins wins **all** the items dropped in the battle-- consisting of those opened by challengers.

If luck is on a gamer's side, they can stroll away with a stock worth significantly more than their preliminary buy-in. If luck stops working, they lose everything. It is this high-risk, high-reward dynamic that drives the immense appeal of the format.
